

Document Creator

What a relief. Developing reports made easy at last.

Making NAV Reports was, to put it mildly, never an easy task. Developers and consultants had to struggle through a painstaking process. At idyn, it inspired us to come up with Document Creator. This add-on enables developers and consultants to develop reports in less time, with less stress. Even end user are now able to make simple adjustments.

NAV Reports with Document Creator: goodbye to complex installations

With Document Creator building reports is almost fun. Whether you are a developer, a consultant or an end user, anyone can make changes. You no longer need in-depth knowledge. All you need is working within Microsoft Dynamics NAV. Document Creator is a fully functional .NET report designer for Microsoft Dynamics NAV, compatible with NAV2015 and up. Document Creator:

- 100% integrated in Dynamics NAV;
- is rich in functionality;
- has more options than before;
- is easy to use;
- offers you fantastic reports.

This is reporting made easy again.

Independent of your development environment

One of the landslide features of Document Creator designer is, that it does not depend on the development environment such as VisualBasic. So, you will no longer face difficulties with rights and role structures in NAV.

If needed your customers can change the lay-out of the reports themself.

Document Creator

Another smart Microsoft Dynamics NAV
add-on by idyn

.NET

Including .NET
report designer

No difficult and time
consuming installations

Drag & Drop fields
into the report

At idyn, we specialize in developing add-ons for Microsoft Dynamics NAV. These add-ons aim at three target groups: users of Microsoft Dynamics NAV, developers and our partners. Document Creator is an end user solution. It helps to make the lives of thousands of employees worldwide easier. As a result, organizations are more productive.

Here's why Document Creator is such a big relief

- .NET
- The report designer does not depend on the development environment
- No difficult and time consuming installations
- Complete and intelligent, relational datasets with a clear deep layer structure
- Drag & Drop fields into the report
- Quick Report creation from scratch
- Intuitive report editor
- Choose your own code per report (VB.NET | C#)
- "Double pass" functionality, necessary for e.g. total number of pages
- Even better than Classic reports, with more possibilities, no longer depended on RDLC
- Barcode usage, including various QR codes
