

ShipIT 365

Integrate with over 1250 carriers
directly from Microsoft Dynamics
365 Business Central

MAERSK

SCHENKER

Easy access to over 1250
international carriers.

Ship & print labels directly
from Business Central with
no vendor lock-in.

Integrate ShipIT 365 into the
Mobile WMS by Tasklet
Factory to pick, pack and
ship from your hand held
devices.

One simple solution to connect to carriers and automate your shipping process

ShipIT 365 is the easiest way to manage your shipping process and print shipping labels directly from within Business Central. Open the app in Business Central and select your preferred carrier for your shipment.

Optionally, you can browse through your own rates and contracts and make a selection. As soon as your transport order is set and ready, ShipIT 365 takes over. Eliminating the need for manual data entry, saving users time and reducing human errors.

Integrated carrier communication, without vendor lock-in

Integrate one or more carrier platforms into Business Central. ShipIT 365 offers you simultaneous integration with multiple platforms. Choose the carrier platform that best fits with the needs of your organisation.

Information the way you want it

ShipIT 365 automatically 'translates' your order to the requirements of the selected carrier and allows for easy transport registration, label printing, email notifications and also printing of additional transport related documents such as CMR's or Pro-Forma invoices. Users can also cancel shipments directly in Business Central and even set their own pick up time schedules.

ShipIT 365

Optimize your shipping process

Connect with 1250+
carriers worldwide

Print all transport
documents in real-time

Real-time transport
status information

Advantages for you:

Ship with 1250+ carriers directly from Business Central.

Shipping data preferences only needs to be entered once. This reduces error rates and improves productivity.

Save on transport costs. Choose the optimal carrier option based on:

- Real-time rates per carrier
- Delivery date and time
- Lead time of the transport

Over 5 million shipments are sent annually using ShipIT 365.

ShipIT 365 is configurable for your organisational needs:

- Different types of orders supported including: sales order, warehouse shipments, return order, transfer order & service orders.
- Shipping labels can be printed on ZPL230 or similar printers.
- Additional documentation can be included for printing, such as: packing slips, international transport documentation (CMR, Commercial invoice, Pro-Forma invoice, CNN22).

Optionally, invoice the freight costs to the customer. No need to develop and maintain interfaces with carriers yourself.

Real-time Track & Trace and status information available to you and your customers.

Integrated online help.

At idyn we are specialised in the development of integration add-ons for Microsoft Dynamics NAV and Microsoft Dynamics 365 Business Central. These applications focus on three target groups: NAV/Business Central users, developers and our partners.

Add Tasklet Factory to your integration to ship from your handheld scanner.

Optimise your warehouse and operations using Mobile WMS from Tasklet Factory. ShipIT 365 & Mobile WMS integrate directly with the standard functionality of Business Central.
