

ConnectIT 365

Simplify Connecting

Create your interface in hours not days

Design your own import and export interfaces - without any coding - directly within Microsoft Business Central. Whether you're using BC SaaS or On-Premises, ConnectIT 365 makes integrating your Business Central with the rest of the world simple and efficient.

Easily manage data imports and exports in Business Central with ConnectIT 365. If you need to connect Microsoft Business Central to any data source safely, cost-effectively, and effortlessly, ConnectIT 365 is your solution. This app combines user-friendliness with powerful versatility, streamlining interface-building for both developers and non-technical users.

Simplifying the interface creation process

Building interfaces is no longer time-consuming with ConnectIT 365. The tool guides you step-by-step, making it easy even for non-technical users. It offers a fast, efficient way to create and modify interfaces, saving both time and money with its flexible, user-friendly design.

Maximize productivity with advanced features

ConnectIT 365 supports both simple and complex use cases. It allows for chaining imports, handling structured datasets, and integrating Azure services during imports and exports. The import project wizard simplifies design and mapping, allowing you to build custom integration extensions effortlessly.

ELEVATING 3,500 BUSINESSES WORLDWIDE THROUGH SMART APPS FOR BUSINESS CENTRAL

Simplifying data management with ConnectIT 365

Ease of use, simplifies the entire process ConnectIT 365 is a low/no-code solution fully integrated with Microsoft Business Central, designed to be effortless to set up, learn, and use. Managing your data export and import interfaces has never been easier - there's no need for advanced technical knowledge or additional middleware. This toolkit simplifies the entire process, allowing you to focus on your business needs without worrying about complex configurations.

Seamless integration in business central

ConnectIT 365 is a low/no-code toolkit that's fully integrated and easy to set up. It streamlines data import/export and synchronizes data across Business Central companies or tenants, ensuring efficient operations. Master data management is simplified, providing seamless master data across multiple entities.

Versatile data integration with connectIT 365

- Supports data export/import in XML, JSON, CSV, and Excel formats.
- Available methods: manual setups, SFTP, FTPS, Web services (REST APIs), SOAP, Azure Storage, Service Bus, Event Grid, Dropbox, and intercompany data transfers.
- Includes built-in AL functions, conversion tools, and event subscription for custom data manipulation.
- Offers precise control with the ability to monitor and filter data at the record and field level.

With ConnectIT 365, data integration is both powerful and easy to manage, simplifying complex processes for users and developers alike.
