Mobile WMS & WMS Mobile NAV integration	Free	Free	
¹ Yearly subscription – Price per month			
Contact sales@idyn.nl for more information			

Additional Package Type Content Module

- This module extends ShipIT functionality with the capability to assign items to an individual package.
- It becomes visible what is in which package.
- The request message to the carrier is then expanded to include this information per package.
- More and more required by carriers for export shipments
- Required for connection with EasyPost

ShipIT 365 operates in connection with the carrier platforms Shift Transsmart, nShift Ship, Sendcloud, or EasyPost.

For ShipIT 365, two components are required; the ShipIT 365 integration and an account at one or more connected carrier platforms. You choose between nShift Transsmart, nShift Ship Sendcloud, or EasyPost.

ShipIT 365 Single Carriers (one company per BC database & single carrier)

ShipIT 365 Single Carrier allows customers with one company in a Business Central database to integrate with a single carrier.

ShipIT 365 – Tasklet Factory integration

Expand the capabilities of ShipIT 365 with the Mobile WMS solution by Tasklet Factory. Create transport orders and print labels directly from handheld scanners. The Mobile WMS, Pack & Ship extension to link ShipIT 365 to the Tasklet WMS is offered free of charge. The WMS Mobile NAV integration is also offered free of charge.

ShipIT 365 - WMS Mobile NAV integration

Expand the capabilities of ShipIT 365 with the WMS Mobile NAV from MultiSoft. Click [here](#) for AppSource. ShipIT 365 is licensed per Business Central database and per additional company.

Direct Banking W1, NL, BE

Direct Banking is available worldwide, Ponto connects only to EU banks, Cobase to EU banks and non-EU banks.

To use Direct Banking, two components are required; the Direct Banking extension developed by idyn and either a Ponto account or a Cobase account. Direct Banking is licensed per Business Central database.

Overview of banking platforms available

Direct Banking integrates your preferred banking platform into Business Central. For BC accounts with only European bank accounts Ponto is the optimal option. For BC accounts with bank accounts outside of Europe (non-IBAN and/or international payments (non SEPA) Cobase is preferred).

Ponto

Connect your bank accounts via the Ponto platform in accordance with PSD2 and Open Banking legislation. Daily statements are directly imported into your Business Central. Payments will be exported directly to the Ponto platform for approval. No more file exchanges needed.

Cobase

Connect to the Cobase platform with over 15,000 integrated banks worldwide. Perform your banking from Business Central and authorize payments across all your banks with a secure app or token, no need to enter or use banking credentials to execute payments.

OMA for NAV

With an OMA 365 license the customer is also allowed to use the OMA version for NAV and including BC 14.

OMA (for NAV) is available via Myidyn from NAV 3.70 - 2018 BC 13 and BC 14

Object Manager Advanced (for NAV)

Development version

Available for partners and end users.

For end users there are 2 price levels for the add-on, based on the presence of following modules:

- Customer has only AB – Application Builder (Module 7200)
- Customer has AB – Application Builder (Module 7200) + SD – Solution Developer (Module 7300)

The development add-on is licensed per PSBC ID (formerly Voice ID) through MS granule 11102055 OMA Developer Edition.

Customer Deployment version

Separate module which can be used to deploy objects to customers. User count is as reported by Microsoft PartnerSource in the ISV module install base reports*. This module is available for end user companies:

- Without development modules 7200 and/or 7300 in their NAV/BC license.
- Related NAV/BC partner or parent company is licensed to a development version of OMA.

*A NAV license upgrade (user increase over 20 or adding the SD module (7300)) requires a mandatory OMA upgrade.

The deployment add-on is licensed per PSBC ID (formerly voice ID) and is licensed through MS granule 11102060 OMA Customer Edition.

For a comparison of functionalities between the development and deployment version, please see:

<https://my.idyn.nl/user-guides/object-manager-advanced/developer-vs-customer-license.html>

Appendix 1

Subscription period	Extra surcharge	Invoicing
Monthly	25%	Monthly
One year (standard)	0%	Annually
Three year price protection for 3 years	0%	Annually
contact sales@idyn.nl for more information		

Invoices for subscription fees are sent by idyn before the start of the next period and have a 30 days NET payment term.

An invoice for subscription fee is not paid in full in due time by partner, then idyn retains the right to end the subscription plan. To reactive a terminated subscription plan idyn raises an invoice containing fee(s) for the elapsed period(s) where elapsed periods are calculated starting from the last period for which payment was received up until the current period. An administration fee equal to one month subscription fee.

Migrating NAV license to BC subscription

Customers who are currently using NAV add-ons and wish to upgrade their current solution(s) to the Business Central version(s) can do so:

- Subscription customers: the NAV based subscription will terminate upon expiry of the current period and will be replaced to an AL based subscription when a license key has been issued.
- Customers with perpetual licenses and on valid maintenance plans: upon idyn issuing a license key for the BC app, the customer's maintenance plan continues for 2 years, after which the BC-based subscription will automatically start and be invoiced at the current pricing level that applies when transitioning to the subscription price (i.e., the prevailing price after the 2 years).

EULA and other conditions

End User License Agreement

The end User License Agreement (EULA) applies to all idyn software licenses. See: www.idyn.nl/end-user-license-agreement/
Currently the only accepted payment method is by bank transfer.

Azure hosted Integration-as-a-Service. The idyn integrations use an Integration-as-a-Service setup, which uses a set of Azure services which run outside of Business Central. For Microsoft Azure Terms & Conditions see: azure.microsoft.com/en-us/support/legal/

Appendix 2

Supported Version and idyn Support Services

On-premise

We are no longer provide support for any versions earlier BC 18. Additionally, these versions will not receive any app or software updates.

Check the current OnPrem app availability for BC versions on the [My idyn portal](#). A login for My idyn can be requested via sales@idyn.nl

SaaS

For SaaS, we only offer support for the latest and the previous App version. If you do not have these App versions yet, you must upgrade first before your support request can be processed.
